**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:
2. The base claims are 56 and 76
3. They can be summarized as follows:

*56.* A plastic based composite product comprising:

- a plastic mass
- wood particles homogeneously embedded in the plastic mass, the particles have tensile strength in a first particle direction
- the particles comprise
  - o small particles of fibers
    - random orientation
    - length of 0.2-2 mm
  - o large particles
    - dominantly oriented such that their first particle direction is in the chosen principle product direction
    - length is larger than small particles
    - length 2-6 mm

- Claim 76 differs in that the plastic mass is thermoplastic.*
4. The closest prior art found can be summarized as follows:

Cogswell et al. (4,559,262) discloses a fiber reinforced composition comprising a thermoplastic matrix with embedded long and short fibers. The long fibers are 3-100 mm in length and at least 50% of the fibers by volume are aligned in the direction of draw. The short fibers have a length of up to 0.25 mm and are blended into the mix.

Art Unit: 1772

Cogswell fails to disclose wood particles and randomly orientated small particles.

5. In summary, the prior art of record fails to teach or suggest the plastic based product having all the features of the base claims.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
